

Perimeter Security Drone

"There was a 911 call claiming an active shooter was on campus. The call ended up being a hoax. As the first responder, it would have been great to send a drone to get a view of the area and situation before we arrived on scene."

- Security Officer, Univ. of Nevada, Reno

Specifications:

- **100 minutes of flying time**
- Drone can be dispatched within a minute
- Off site Ground Control Center (GCS) can remotely control the drone for search operations
- Precision, Thermal and Night Vision cameras on board for complete site evaluation
- Real time video transmitted to GCS
- On-board speaker is capable of broadcasting remote warnings and information
- **Optional tool: capability of subduing the suspect**
